DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I, claims 1-18, in paper No. 6, and further election of Species I and a) figures 1-3, claims 1, 5, 6, 10-12, 17, and 18 in Paper No. 11 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 2-4, 7-9, 13-16, and 19-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species/invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 11.
3. Please note, that the examiner withdrew claims 2-4, 7-9, and 13-15 since the elected species does not contain the elements set forth in those claims, and there is no showing in the figures.

Specification

4. A substitute specification excluding the claims is required pursuant to 37 CFR 1.125(a) because a numerous of corrections to the specification render it difficult to consider the application.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the

Claim Rejections - 35 USC § 112

~~5.~~ The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

~~6.~~ Claims ~~1, 5, 6, 10-12, 17~~ and ~~18~~ are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Claims 1, 5, 6, 10, and 11, there is no antecedent basis for “said one or more injury effectors” and “said one or more therapeutic-substance delivery ports”.

The examiner suggests the use of --the at least one injury effector--and --the at least one therapeutic-substance delivery effector--. Moreover, the use of “or more injury effectors” render the claim indefinite because the elected species contain only one injury effector.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1, 5, 6, 10-12 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Edwards et al (US 5,536,267).

Art Unit: 3763

Edwards discloses a device for treating ischemic tissue having a shaft 12, a control structure 18, at least one injury effector and at least one therapeutic-substance delivery effector at the distal end of the shaft by means of element 22 and spaced from one another.

9. Claims 1, 5, 6, 10, 11, 17, and 18 are rejected under 35 U.S.C. 102(e) as being anticipated by Hofmann (US 6,241,701).

Hofmann discloses a device for treating ischemic tissue (figs. 1-3, 8-9b, 18a-18b, but better seen in figs. 18a-18b) and having a shaft 1810, a control structure 1812 to be connected to the instrument control, at least one injury effector and at least one therapeutic-substance delivery effector at 1822 at the distal end of the shaft.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Abele et al, Paddock et al, Giba et al, Ponzi, Mueller et al, Haim et al, Goble et al, Hofmann et al, Ellis et al, Dev et al, and Edwards et al.
